

TutorLines

Learning Lifeline

Course Management System - Moodle

Tutorlines hosts a powerful course management system "Moodle" to provide a platform for both tutors and students to create an effective online learning community.

The following is a brief list of features supported by the Moodle Course Management System:

ASSIGNMENT enables a tutor to assign tasks to students, collect the results and enable the teacher to grade submissions.

BOOK/LESSON enables tutors create multi-page content in a book-like format and enable students to progress at their pace

CHAT module allows tutors to have a real-time synchronous discussion via the web.

CHOICE enables tutors to ask questions and specify a choice of multiple responses

FLASH VIDEO enables tutors to distribute (Streaming) video content along with some notes + attachments to the students. Students can keep their personal notes about the video/teacher's note.

JOURNAL enables a tutor to ask students to reflect on a particular topic. The students can edit and refine their answer over time.

QUIZ enables tutors to assemble quizzes from the questions in the question bank and to set a variety of options determining how the student interacts with the quiz

WEB MEETING enables to show Presentations, Applications and Desktops to students over the internet. You can chat with webcam.

All possible without installing any software.
